The equipment for the vehicle illustrated can be found on page 55.
The fuel consumption and CO_2 emission figures can be found on page 50.

IN S 801

The art of using power intelligently.

The new Audi S8 does not just impress with its dynamics. It embodies our goal in an inimitable manner: always achieve more. More comfort. More performance. More efficiency. This philosophy creates one of the sportiest luxury saloons of our time: the new Audi S8.

The fuel consumption and CO_2 emission figures can be found on page 50.

More important than concentrated power: utilising it at the right moment.

Performance does not necessarily require higher consumption – as the engine of the new Audi S8 proves. With the innovative Audi cylinder on demand, it only utilises the concentrated power of all eight cylinders when it is actually required. In the event of low driving resistance, four of the eight cylinders automatically switch off. Thus the S8 continues to drive in partial load operation, with correspondingly lower fuel consumption and emissions; however, the comfort and driving dynamics remain unchanged. In order to use the powerful 382-kW output of the 4.0 TFSI power unit even more efficiently, the S8 has additionally been equipped with a start-stop system and recuperation. This turns it into a luxurious, high-performance athlete that intelligently utilises power and endurance: for outstanding dynamic performance with a high level of efficiency.

The fuel consumption and CO_2 emission figures can be found on page 50.

IN S 801

IN S 801

From 0 to 100 in just 4.2 seconds – due to a powerful engine and a unique lightweight construction: the Audi Space Frame can be found underneath the optional crystal effect paint finish in Prisma silver, an intelligent and superior light aluminium structure that enables even sportier handling. Additional top-level driving dynamics are ensured by the permanent quattro® all-wheel drive with sports differential that provides the Audi S8 with a high traction on almost any surface. The optional ceramic* high-performance brakes powerfully bring the vehicle to a standstill.

The fuel consumption and CO_2 emission figures can be found on page 50.

* Please consult your Audi partner or national Audi website to find out more about the special features of the ceramic brakes.

Luxurious sportiness – the suspension.

With Audi drive select in the Audi S8 five modes are available to you. You can choose between a particularly comfortable driving style, an automatic setting that keeps comfort and dynamics in balance, a distinctively sporty and a consumption-optimised mode. The fifth option, individual, offers even more settings to adapt the vehicle's character to your mood – with a just a push of a button. For example, Audi drive select also influences the characteristics of the dynamic steering. At high speeds, it ensures excellent directional stability and at low speeds, even faster reactions to your steering commands. For even more sportiness in every curve.

The fuel consumption and CO_2 emission figures can be found on page 50.

Pure sportiness is revealed not only in the S8's handling but also in its visual appeal. The newly designed S8 Singleframe in Platinum grey with dual struts in chrome defines the sporty front-end. The side air inlets in S-look are offered in black highly polished and equipped with a transverse brace in aluminium look. The exterior mirrors and wide bumpers with a blade in aluminium look perfectly match the appearance of the classy athlete. The optional S-specific 21-inch cast aluminium wheels in 5-triple-spoke design underline this powerful look. Dual-branch twin tailpipes in chrome look and the diffuser insert in aluminium look/Platinum grey at the rear round off this vehicle in a striking manner. The brilliance and intensity of the optional crystal effect paint finish in Prisma silver additionally complete the high-quality overall appearance.

The fuel consumption and CO_2 emission figures can be found on page 50.

MMI

Powerful take-off, relaxed cruising – or both.

A concentrated atmosphere reigns in the interior. From the leather-covered multifunction sports steering wheel with contrasting seams to the S emblem: each element embodies luxurious sportiness and comfort at the same time. The grey instrument cluster with white needles and the shift paddles and pedals in aluminium look are only a few examples. The inlays and the selector lever in Carbon Atlas lend an exclusive touch of quality to the interior. The theme of comfort and stylishness continues through to the illuminated door sill trims with S8 emblem: eye-catching and top quality at the same time.

The fuel consumption and CO_2 emission figures can be found on page 50.

Firm lateral support and impressively comfortable: the standard comfort sports seat in S design in Valcona leather, Lunar silver, with diamond-patterned stitching. Seams, piping and accordion pleats have been designed in the contrasting colour Steel grey – exclusively for the Audi S8. The seat is electrically adjustable in length, height and angle multiple times, allowing you to always enjoy your preferred seat position. A pneumatic seat side bolster adjustment adapts to you and the pneumatic lumbar support ensures relaxation even on longer journeys. Seat heaters, seat ventilation and a massage function are available on request. A striking accent: the start button which draws attention with a red ring to the power that the engine unfolds.

The fuel consumption and CO_2 emission figures can be found on page 50.

Driving experience

To experience the Audi S8 in action, point your mobile phone at this QR code and take a photograph. Or use the following link: audi.com/s8film

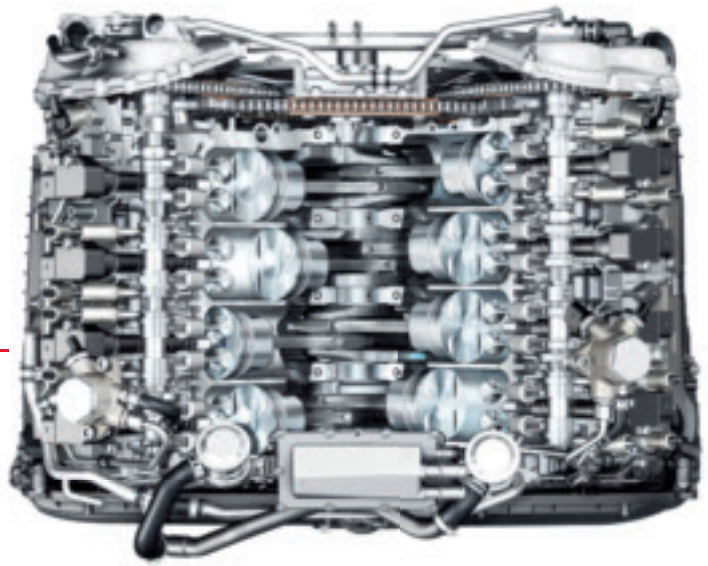
IN S 801

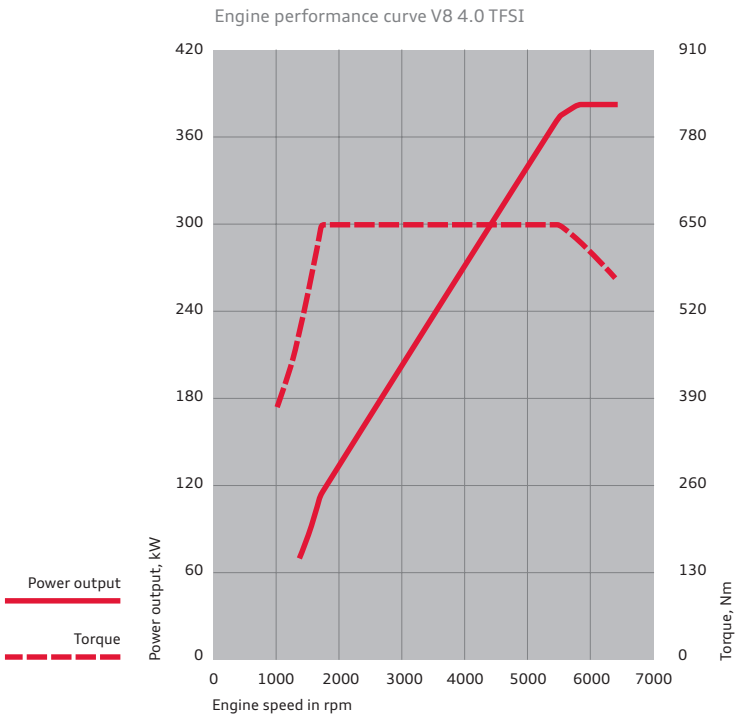
The new Audi S8. Its technology sets new standards, its looks are breathtaking. Its comfort impresses, its intelligence fascinates. It is a pleasure just to look at it – and an even greater pleasure to drive it. Experience an entirely new way of enjoying sophisticated sportiness in the Audi S8.

The fuel consumption and CO_2 emission figures can be found on page 50.

A smarter force.

Audi cylinder on demand in the TFSI® engine.





The Audi S8 has a V8 4.0 TFSI power unit that features the new innovative Audi cylinder on demand. It ensures that during partial load operation, only four of eight cylinders are used – without you noticing the difference. The engine always runs smoothly and powerfully, but uses less fuel and emits less CO_2.

We describe its mode of operation as “intelligent performance”. Audi cylinder on demand specifically only closes certain cylinders, two each per cylinder bank. As a result the engine runs impressively smoothly even during partial load operation. The decision to switch off cylinders depends on a combination of factors: the engine speed must be between 930 and 3,500 rpm, the vehicle must be travelling at a minimum speed of 25 km/h and you must be driving in third gear or higher. If you then do not need the full power of eight cylinders, the Audi valvelift system closes the intake and outlet valves and switches off the injection and ignition of the corresponding cylinders. This means that no air is taken in, no fuel is injected and no exhaust gas is emitted. Or in other words: the consumption and emission values are noticeably improved. In addition, the V8 4.0 TFSI engine features a start-stop system and recuperation and of course fulfils the EU5 emission standard. The power unit works with the Audi valvelift system which generates a higher torque – whilst consuming less fuel. The quattro® permanent all-wheel drive with sports differential supports the sporty potential of the power train.

Thanks to its very spontaneous responsiveness and exceptional power delivery across the entire speed range, the eight-cylinder engine promotes a sporty superior driving style. Its 382 kW accelerate the S8 at a torque of 650 Nm from 0 to 100 km/h in 4.2 seconds. At 250 km/h the engine is electronically regulated.

The fuel consumption and CO_2 emission figures can be found on page 50.

With quattro®, we have invented one of the best all-wheel drive systems in the world.

Of course, that was not enough for us.

quattro® is a permanent all-wheel drive system. If the wheels on one axle of the vehicle lose grip on the road and threaten to spin, then the power is transferred to the other axle – automatically and permanently distributed through the centre differential. The basic distribution is 40 : 60 – 40 % of the power comes from the front axle, 60 % from the rear axle. The benefit is better traction during acceleration and improved safety due to improved grip. So much for the technology. But what makes quattro unique is really the driving feel. “As if you are stuck to the road,” some customers say. We put it like this: quattro gives you a better feel for the road – and with more safety.

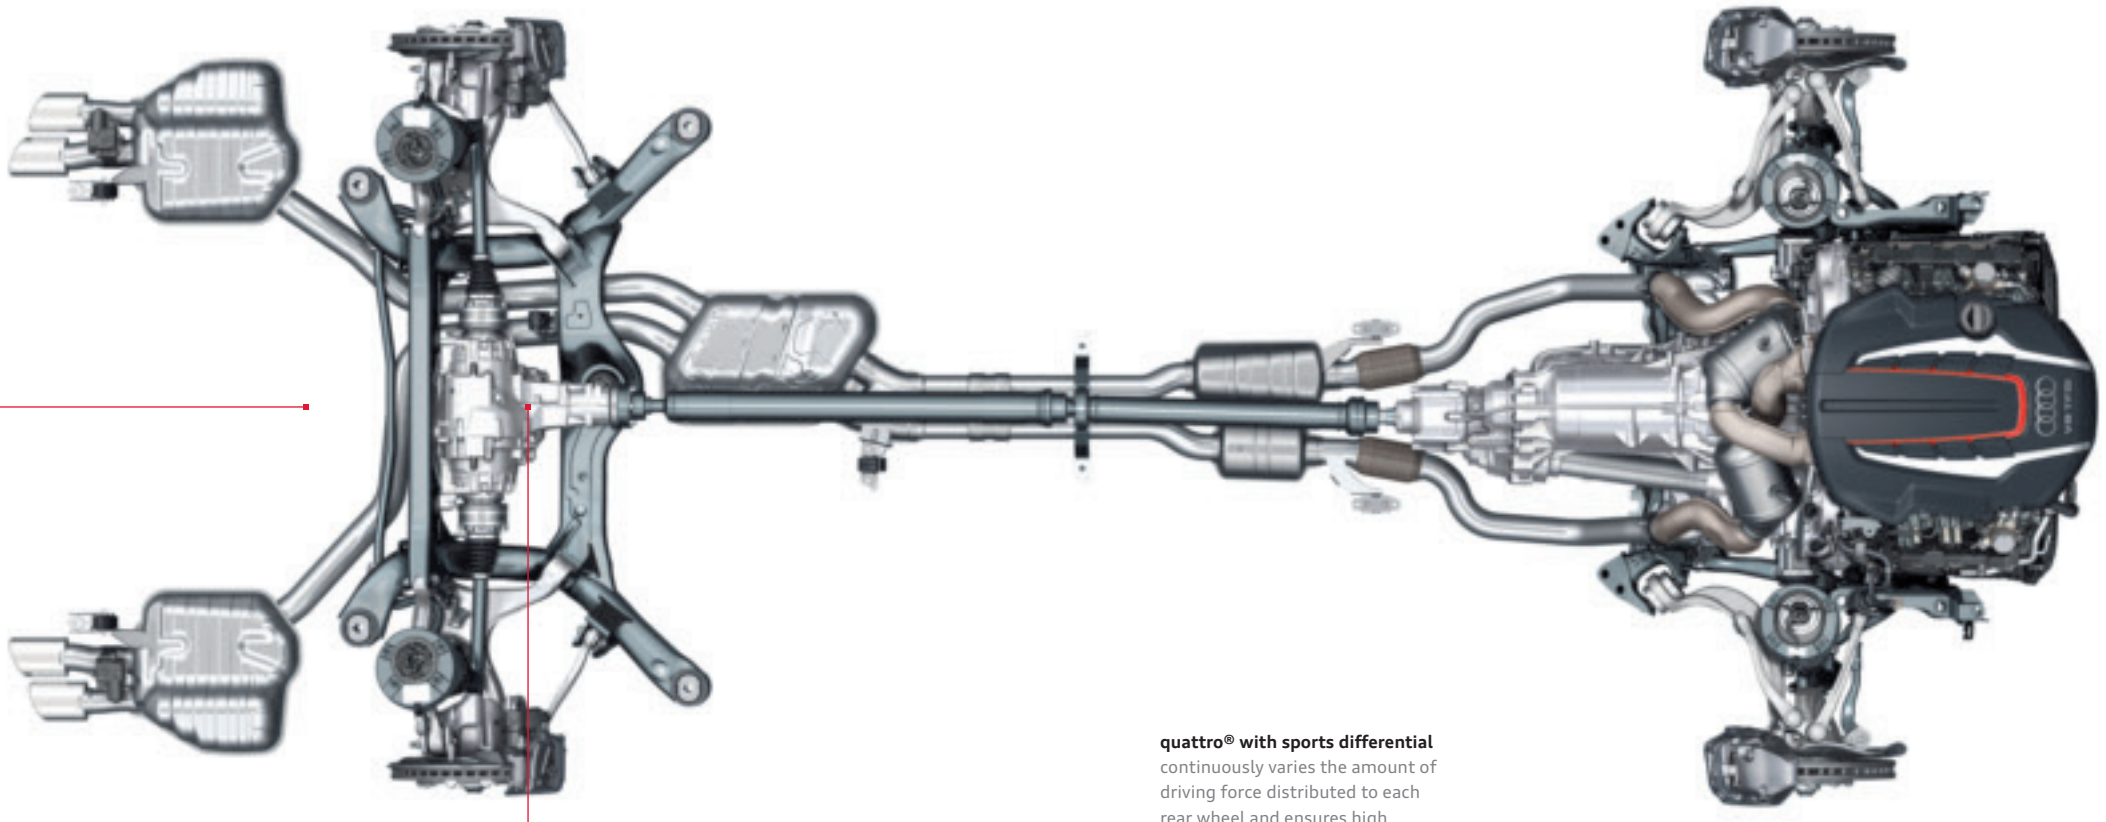
The quattro® with sports differential further reinforces this unmistakeable quattro feeling. Vehicles tend to experience understeer when steering or driving into corners. This is a normal physical process: a moving object opposes a change in direction. The elastic tyres and the suspension mounts tense up until the new direction has been adopted. When accelerating into a corner, the load on the front axle is reduced and it therefore transfers less lateral force to the tyres – the vehicle understeers.

With the sports differential on the rear axle, this tendency has been significantly counteracted. That’s because the quattro rear axle differential has been extended left and right by a clutch system with two gear levels. They ensure that the individual wheels on the rear axle receive different levels of torque.

The clutches are activated by an electrohydraulic actuator. Depending, for example, on the steering angle, lateral acceleration, yaw angle and driving speed, the system calculates the right distribution of wheel torque. In this way the power is specifically channelled to the outer rear wheel when steering or accelerating into a corner.

The sports differential has a reaction time of less than 100 milliseconds and is therefore faster than the ESP. And while ESP can only take effect once there is a certain difference between the steering angle and the rotational movement of the vehicle, the sports differential influences the dynamics of the vehicle before this occurs.

The fuel consumption and CO_2 emission figures can be found on page 50.



quattro® with sports differential continuously varies the amount of driving force distributed to each rear wheel and ensures high cornering agility and impressive driving dynamics.

Fully load-bearing air springs on the front and rear axles of the vehicle provide a sporty and comfortable driving feel.

Dynamics and comfort were once opposites.

We've made the differences vanish into thin air.

Each road is different. So it's good when, despite that, you notice no difference. How does that work? In the Audi S8, the chassis adapts to many driving situations and to the road surface as standard. We call it **adaptive air suspension**. An electronically controlled air suspension system operates individually on each of the four wheels and is combined with an infinitely variable adaptive damping system. Sensors on the body and on the axles monitor the current driving situation and send information to the system during the journey. Furthermore, the air springs guarantee that, even when carrying heavy loads, the vehicle's driving characteristics will hardly be impaired.

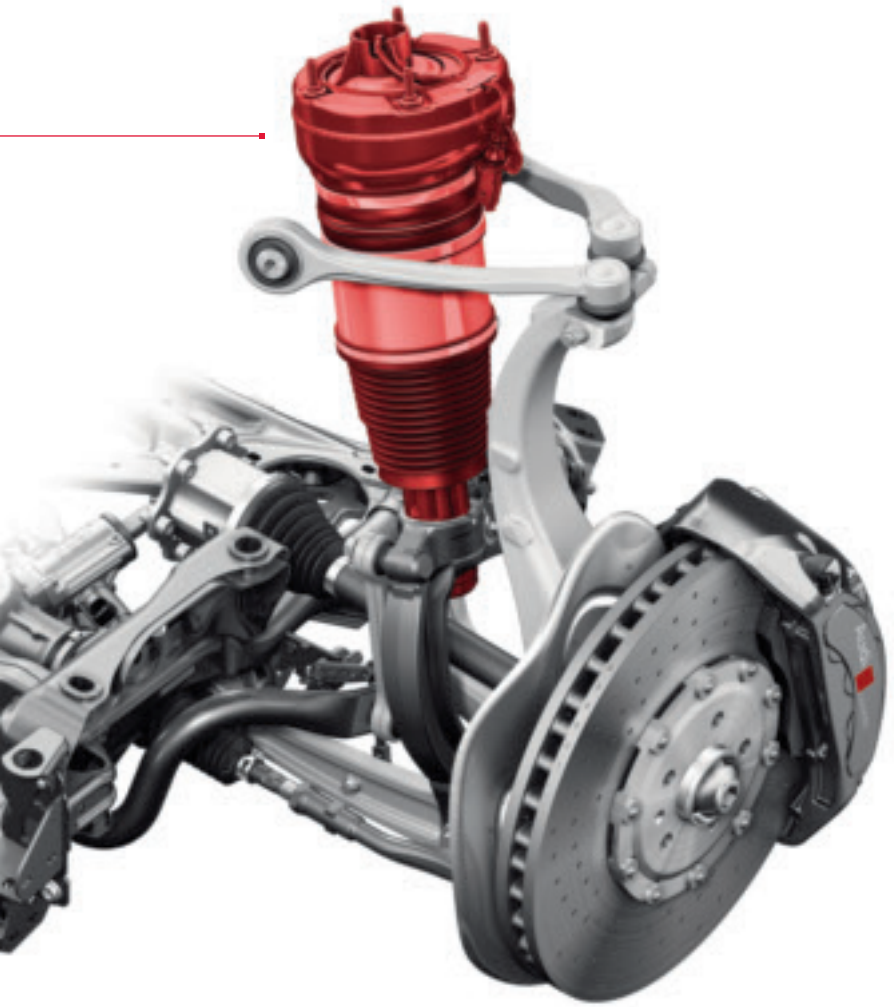
The Audi S8 features the new adaptive air suspension sport with S8-specific tuning. It is controlled by Audi drive select and is already tuned to comfort and at the same time to being very agile in the auto mode. At speeds as of 120 km/h, the suspension is lowered by 5 millimetres. The result: the trim is the same as for adaptive air suspension sport, but with additional stiffer damping.

The standard 19-inch high-performance braking system takes a powerful hold with its 8-piston fixed callipers on the front axle. A single-piston floating calliper is used on the rear axle. The brake discs comprise a cast friction ring which is connected to the brake disc chamber by means of steel pins. This so-called floating mounting ensures that the friction ring remains tension-free to a major extent, improving stability under extreme temperature loads.

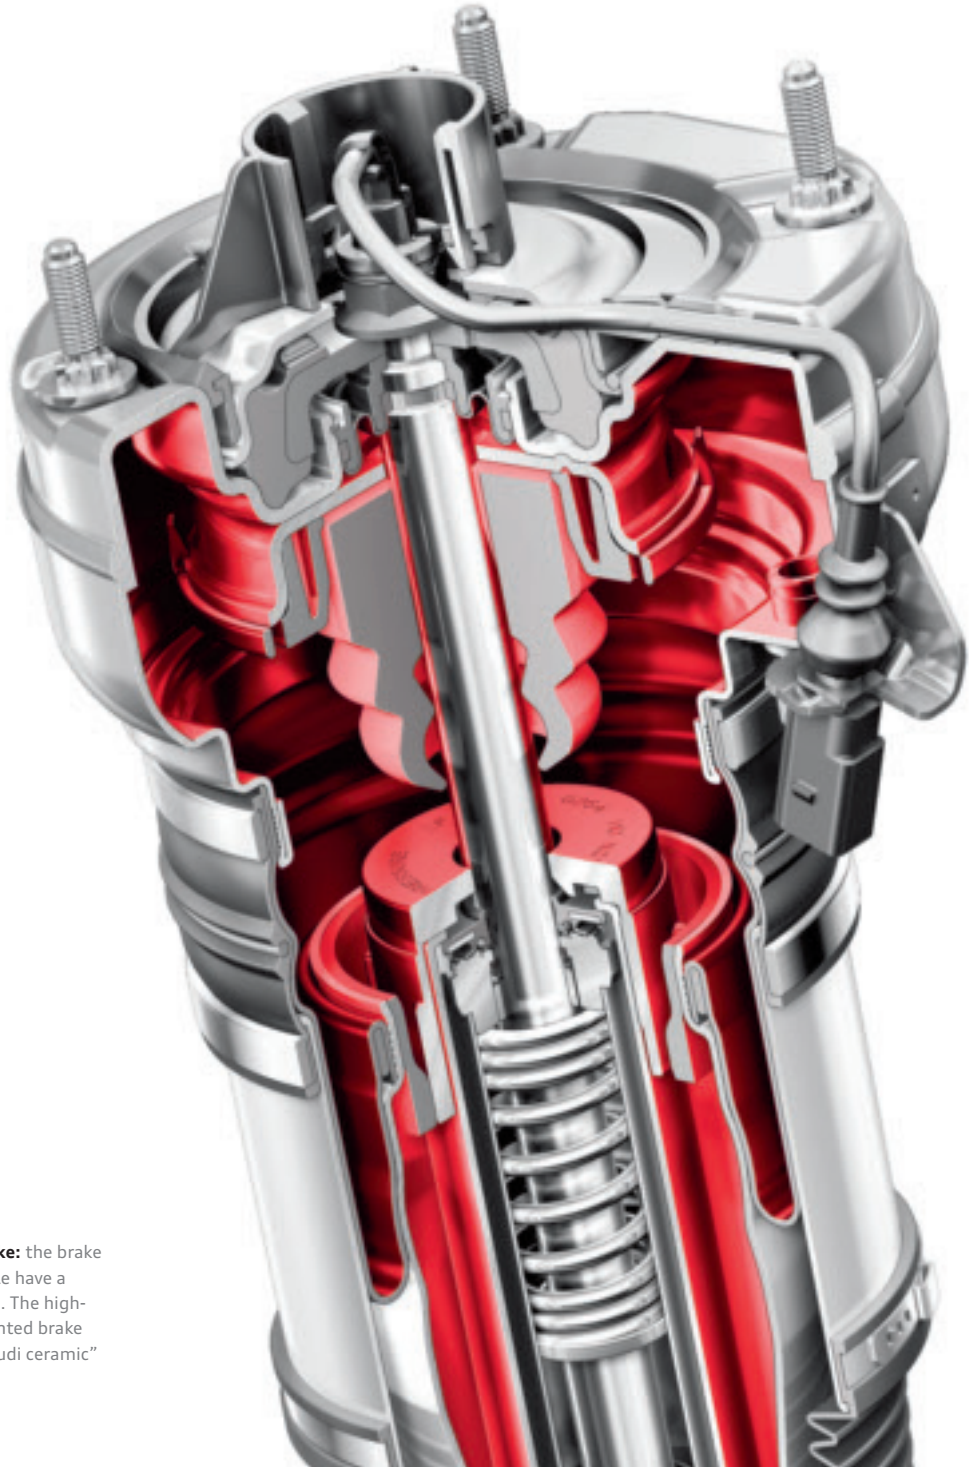
The optional **19-inch ceramic brake*** with a 6-piston fixed calliper is available for even more demanding loads. In this braking system, the brake discs on the front axle are made of a carbon-fibre reinforced ceramic material. This is based on hard and abrasion-proof silicon carbide with embedded high-strength carbon fibres. This combination results in an enormous abrasion resistance which allows extremely high mileages to be achieved, while reducing sensitivity to high thermal loads.

The fuel consumption and CO_2 emission figures can be found on page 50. *Please consult your Audi partner or national Audi website to find out more about the special features of the ceramic brakes.

The almost infinitely variable damping adjusts itself automatically to every driving situation in fractions of a second. Even with asymmetrically distributed loads, the vehicle remains in a level position thanks to continuous ride-height regulation.



19-inch ceramic brake: the brake discs on the front axle have a diameter of 400 mm. The high-sheen anthracite painted brake callipers have the “Audi ceramic” logo.



Subject: Light

LED headlights

<300 °C

Conventional light bulbs reach temperatures of up to 300 °C. Due to their sophisticated technology, LED lights are somewhat more sensitive and should not get hotter than 150 °C. Because of the engine, the temperature of the area around the headlights is already around 120 °C. In theory, then, LED headlights would need an additional cooling system to be able to work. However, the Audi engineers did not want to spoil the good low-energy credentials of the LED headlights, so they developed a fan which directs heat away from the LED chips. The special feature of this fan is its additional benefit. The high operating temperature of standard bulbs means that they can defrost the headlights, which LEDs cannot. The newly developed fan directs warm air from the LED chips directly to the headlight lens and thus defrosts them and prevents them from misting up.

Daytime running lights

Main beam

Dipped beam

Indicator

Less energy, more light:

the first Audi S8 with full-LED headlights.

In 2008, the Audi R8 set the standard as the first sports car with full-LED headlights. Now this special lighting is available for the Audi S8 too as standard. Full-LED headlights not only require less energy than standard lighting systems, but also provide a brighter light which is perceived to be much more pleasant. The dipped beam consists of a distinctive line of ten individual light modules. This makes the Audi S8 unmistakable, even at night. Main beam, daytime running lights and indicators are also produced using LED technology. The use of the same material for all functions makes completely new lighting effects possible. The S8 therefore has the right light for every situation: it has a motorway light which, at speeds above 110 km/h, automatically almost doubles the range of the light cone (from approx. 70 m at dipped beam to 150 m with motorway light). In addition, the S8 has a combined daytime running light/indicator light unit and an all-weather light which makes conventional front fog lights superfluous. The individual LED modules are skilfully controlled to redistribute the light, reducing glare from rain or fog.

Turning light

Phone: The optional fitting for mobile phone (Bluetooth) or the Bluetooth car phone online have a menu screen with call lists, address book and selection interface as the initial setting.

MMI® touch: You can “write” with your finger on the MMI touch. The system recognises letters and numbers. It can be used for navigation and for your phone. In jukebox mode, you can also thumb through the albums of your music collection with a brief stroke of the finger.

Navigation system: The hard disk navigation system MMI navigation plus with MMI touch provides a 3D map view and a three-dimensional representation of well-known buildings and sights.

Media: Display of available media sources such as jukebox, inserted SDHC cards, Audi music interface or CDs and DVDs; display of optional TV tuners

Follow your intuition –
and you’ll get there.

We try to match up to our claim of “Vorsprung durch Technik” in every aspect of an Audi – such as in the case of the advanced MMI® – Multi Media Interface, for example. The MMI is used to control a wide variety of media in the car, as well as the navigation system and other convenience functions.

It used to be simple to operate the MMI – and now it’s even simpler. A reduced number of buttons brings greater clarity. The control buttons for the radio and media are logically arranged near the volume control. The six other buttons, known as hard keys, used for example for the phone or for navigation, are on the main turn-and-push control – for intuitive operation. Another new feature is the carousel mode in the MMI display.

This makes it even clearer to understand, and you get to your destination even more easily. The special thing about the optional MMI® navigation plus is the unique MMI® touch. It is located to the left of the main control panel and within easy reach, especially in conjunction with the new gear selector lever. With the MMI touch you control such functions as navigation in a new and intelligent way – by “writing” letters or numbers with your finger on the touch-sensitive control panel. The system acknowledges your input after each character by means of audible feedback. You can also browse through the albums in your music collection on the jukebox – a flick of the finger is all it takes.

Audi connect: Traffic information online
You not only get the right route to your destination but the quickest one too.
In addition to traffic flow information, traffic information online provides faster information on the formation and dissolution of traffic jams for dynamic route guidance as well as greater coverage of the road network.

Audi connect: Travel information/weather provides weather forecasts and relevant information, such as charts and weather maps relating to the destination. **Audi connect: News online** provides comprehensive news items about current world events.

Audi connect: Navigation with Google Earth images and Street View* enables navigation with high-resolution aerial and satellite images, photographs, topographical features, roads and their designations, and business entries. In Street View* you can form a realistic picture of your destination even before you arrive. With the **Google point-of-interest (POI) search function** with voice control, you get detailed tips about holiday destinations, opening hours or visitor reviews, and you have access to the entire breadth of the Google Internet database wherever you may be. **Destination input by means of myAudi or Google Maps** enables you to plan your route on your home computer with individual navigation destinations, and then send it to the vehicle. When you start your journey the planned route is loaded into MMI navigation plus.

Audi connect.

Always online, even on the road.

Mobile information services offer the ultimate connection. With Audi connect you can easily search the Internet via Google for any special destinations in the MMI®, or retrieve the latest news and the current weather forecast for the intended navigation destination. Data transfer is by means of the UMTS module of the Bluetooth car phone online, which can be ordered as an option for the MMI® navigation plus with MMI® touch.

One special feature is the **WLAN hotspot**. With a laptop, an iPad or a netbook you can retrieve important information, data and e-mails just as conveniently as in your office at home. There is an application for **Internet radio*** available for some smartphones. Detailed information about availability, usage rights and charges can be found on page 45 or obtained from your Audi partner.

*For information on when this feature will be available, please contact your Audi partner.

Seat covers

Alcantara/leather combination
the Alcantara/leather combination lends the comfort sports seat an exclusive, sporty look. The seat centre sections in Alcantara provide exceptionally good support and are well suited for dynamic driving styles; the side bolsters made from the finest Valcona leather complete the look. Thanks to rapid temperature equalisation, this combination offers high levels of seating comfort and a good seating climate. It is particularly hard-wearing, easy to clean and resistant to wear and tear.

Valcona leather
a high quality leather, which contributes to the elegant charisma of the interior. The low use of lacquer allows the material to breathe whilst the non-grained surface underlines the sophisticated character. Valcona leather is tanned without the use of chromium, dyed through and treated with non-fading colour pigments.

Natural leather
the natural appearance of natural leather imparts a luxurious character. Low use of lacquer and the nongrained surface help maintain the natural characteristics of the leather and create an excellent seating climate. Over time, characteristic signs of use create a typical patina. Natural leather is tanned without the use of chromium, dyed through and treated with non-fading colour pigments.

Valonea leather
a special manufacturing method, in which the leather is tanned using plant extracts, makes this natural leather really exclusive. It is completely dyed through, is not coated in lacquer and yet is water- and dirt-repellent. The natural characteristics of the leather are shown to their best advantage and the leather boasts excellent breathability, softness and an incomparable natural feel. The plant-based tanning process creates a special microclimate that ensures exceptional moisture control. The characteristics of this leather give it a very special aura distinguished by an agreeable feeling of warmth and an exquisite classic leather aroma. The head restraints, selector lever and cushioned hand rest, all in the same colour as the seats, are in soft Nappa deerskin whose unique natural surfaces are a perfect match for the quality of the Valonea leather.

Audi exclusive leather upholstery and trim
available in quality Valcona and Alcantara/leather combination. 4 different packages are available. Any of the colours can be selected for the leather, seams and piping to suit your own individual taste. From quattro GmbH

Leather package
(scope 1) centre console and knee pad, door arm rest upholstery and steering wheel airbag cover in Fine Nappa leather with decorative seams

Extended leather package
(scope 2) in addition to package 1, lower door trim and door pockets, bottom side of the instrument panel and glove compartment and MMI fascia in Fine Nappa leather with decorative seams

Full-leather package
(scope 3) in addition to the extended leather package, top side of instrument panel, door rails, front-seat trim and backrest covers, head restraint lining front and rear in Fine Nappa leather with decorative seams; includes headlining in Alcantara and electric sunblinds for the rear window and the rear door windows

Audi exclusive leather upholstery and trim (package 1)
available in Valcona leather. Leather trim for: seats, centre arm rest and door panel inserts. Individual choice of colour for the leather, the decorative seams from a range of 15 different Audi exclusive colours. If combined with the individual rear seats package, the comfort seats feature piping in any choice of colour. From quattro GmbH

Audi exclusive leather upholstery and trim (package 2)
available in Valcona leather and Alcantara/leather. Leather trim in addition to package 1: centre console with knee padding, door armrest upholstery. Choice of leather or Alcantara for seat centre sections and door trim inserts. From quattro GmbH

Audi exclusive leather upholstery and trim (package 3)
available in Valcona leather. Leather trim in addition to package 2: lower door trim and door pockets, underside of instrument panel, and glove compartment and MMI fascia. From quattro GmbH

Audi exclusive leather upholstery and trim (package 4)
available in Valcona leather and Alcantara/leather. Leather trim in addition to package 3: top side of instrument panel, door rails, seat linings, front and rear head rest linings, steering wheel incl. airbag cover and body. Top side of instrument panel available in the following Audi exclusive leather colours: Chestnut brown, Classic red, Crimson red, Havana brown, Jet grey, Smoky blue, Night blue, Iceland green, Jet grey, Night blue, Saddle brown, Smoky blue. Individual choice of colour for the leather, the decorative seams and piping (when comfort seat is ordered). From quattro GmbH

Audi design selection Balao brown
an exclusive combination of a refined interior colour, special materials and an extended range of features. The package includes seats in Balao brown Valcona leather with accordion pleats, contrasting seams and piping in Snow white; rear parcel shelf in Balao brown Alcantara, headlining, upper pillar trim and sun visors in Snow white Alcantara; top side of dashboard in Mocca brown with lock seams in Snow white/Mocca brown, dashboard underside in Balao brown, centre console and knee padding in Balao brown with lock seams in Snow white, upper inlay in Fine grain ash, natural Balsamic brown; lower inlay in brushed aluminium, silver. Additional equipment: metallic or pearl effect paint finish, comfort seats with memory function, electric sunblinds on the rear window and on the rear door windows, heated seats front and rear, seat ventilation and massage function at the front; dimming exterior mirrors; 4-zone automatic air conditioning; front comfort arm rest; ambient lighting; full leather package; extended aluminium look on interior; “design selection” emblem in the doors

Audi design selection Brass beige
an exclusive combination of a refined interior colour, special materials and an extended range of features. The package includes seats in Brass beige Valcona leather with accordion pleats and contrasting seams and piping in Granite grey; rear parcel shelf in Brass beige Alcantara, headlining, upper pillar trim and sun visors in Snow white Alcantara; top side of dashboard in Granite grey with seams in Brass beige, dashboard underside in Brass beige, centre console and knee padding in Brass beige with lock seams in Granite grey, upper inlay in Fine grain birch wood, Pearl beige; lower inlay in brushed Aluminium silver. Additional equipment: metallic or pearl effect paint finish, comfort seats with memory function, electric sunblinds on the rear window and on the rear door windows, heated seats front and rear, seat ventilation and massage function at the front; dimming exterior mirrors; 4-zone automatic air conditioning; front comfort arm rest; ambient lighting; full leather package; extended aluminium look on interior; “design selection” emblem in the doors

Headlinings

Headlining
in cloth, in Lunar silver or Silk beige to coordinate with the selected interior colour

Headlining in Alcantara
in black, Lunar silver or Silk beige to coordinate with the selected interior colour. Headlining, rear parcel shelf, upper pillar trim and sun visors in Alcantara

Headlining in black cloth

Audi exclusive headlining in Alcantara
pillar trims, sun visors and head lining roof panel in Alcantara; grab handles, coat hooks and light unit are colour-matched. Available in 9 different Audi exclusive Alcantara colours. From quattro GmbH

Audi exclusive rear parcel shelf in Alcantara
From quattro GmbH

The model-specific standard and optional equipment can be found in the index from page 52 onwards.

Audi exclusive forged aluminium wheels in 7-double-spoke design, high-gloss polished finish, single tone
size 9 J x 20 with 265/40 R 20 tyres

Cast aluminium wheels in 5-parallel-spoke design (S design)
size 9 J x 20 with 265/40 R 20 tyres

Cast aluminium wheels in 5-triple-spoke design (S design)
size 9 J x 21 with 265/35 R 21 tyres

The model-specific standard and optional equipment can be found in the index from page 52 onwards.

Audi exclusive cast aluminium wheels
in 5-segment spoke design
size 9 J x 20 with 265/40 R 20 tyres

Audi exclusive cast aluminium wheels
in 5-arm structured design
size 9 J x 21 with 275/35 R 21 tyres

Cast aluminium winter wheels
in 5-parallel-spoke design (S design)
size 9 J x 20 with 265/40 R 20 tyres, not suitable for snow chains, permissible top speed 240 km/h

Audi exclusive cast aluminium wheels
in 5-arm rotor design
size 9 J x 21 with 275/35 R 21 tyres

Audi exclusive cast aluminium wheels
in 5-arm rotor design,
titanium look, high-gloss turned finish
size 9 J x 21 with 275/35 R 21 tyres

Wheel bolts, anti-theft
can only be loosened with the supplied adapter

Tyre repair kit
with 12 V compressor and tyre sealant, located under the loading floor cover in the luggage compartment, top speed 80 km/h

Spare wheel, space-saving
(can only be ordered with jack)

Tyre pressure monitoring system
visual and acoustic warning if the pressure drops in one or more tyres; display in the driver information system

Vehicle tool kit
in the luggage compartment

Jack
in the luggage compartment

Lights

LED headlights
featuring LED dipped beam, main beam, daytime running lights, indicators, static turning light, all-weather light and motorway light function with LED technology; includes high-beam assist for automatic switching between main and dipped beams, an all-weather light function to reduce the risk of the driver being dazzled when light conditions are poor (in fog, rain or snow) and an additional motorway light which automatically increases headlight range from a speed of approximately 110 km/h; LED technology allows near daylight illumination of the road; minimal energy requirements, long service life, and excellent recognition by other road users, thanks to the crisp Audi lighting pattern with day and night design configurations

Light/rain sensor
automatically switches the dipped beam or windscreen wipers on/off depending on the light and rain conditions; includes delayed deactivation/automatic activation of the rear lights/number plate lights when parking/opening the vehicle

Interior and exterior lighting package
Exterior: courtesy lighting on the underside of the door handles, LED door handle lighting to facilitate entry and exit in the dark; automatically activated when the doors are unlocked; includes passive internal door reflectors
Interior: luggage compartment and glove compartment lighting. LED “Polar” (cold white) lighting for: roof module with reading lights, door pockets, front and rear footwells, inside door handles, door trim, make-up lights, light bands between the grab handles at the side, side-mounted reading lights at rear

Ambient lighting
anti-glare LED lighting for the passenger compartment. Comprises ambient light band in roof module and light bands between the grab handles at the sides to provide background lighting during the journey. Lighting for door pockets, footwells and inside door handles, reflected lighting for centre console and door inner panels to help occupants find their way around. Surround lighting for the centre console (floating effect), illuminated door sill trims and active door reflectors. Can be personalised by adjusting the brightness within 4 different zones, each with 20 dimming stages and by selecting one of three colour moods: Polar (cold white), Ivory (warm white) and Ruby/Polar (red/cold white). Configured via MMI

adaptive brake light
brake light flashes during emergency braking to warn following traffic; hazard warning lights are activated automatically when the vehicle comes to a stop

LED rear lights
LED brake lights tail lights and indicators; faster activation means earlier recognition by the driver behind; reversing lights in white, 2 rear fog lights; 3rd high-mounted brake light in the rear window

Additional reading lights in the rear
reading lights with LED technology integrated into the vehicle headlining

Mirrors

Exterior mirrors with integrated LED indicators
electrically adjustable, heated and folding, automatically dimming on both sides with memory function; convex, flat or aspherical mirror glass

Interior mirror, automatically dimming
recognises with the aid of a photocell when the headlights behind are too bright and dims automatically

Exterior mirror housings
in aluminium look

Roof systems

Glass tilt/slide sunroof
with tinted single-glazed safety glass and infinitely adjustable sun shield; wind deflector extends automatically in stages depending on roof opening and speed; convenience closing from outside via the central locking system and the radio-operated remote control

Solar tilt/slide sunroof
solar cells in the roof provide the power required to generate a continuous flow of air to reduce passenger compartment temperature when the vehicle is parked; operated like the glass sliding/tilting sunroof (but has no infinitely adjustable sun shield)

Closing systems

Engine start-stop button
with a red ring; the engine is started and switched off via the engine start-stop button in the centre console; the key only needs to be carried with you

Luggage compartment lid, automatically opening, including power-assisted closing
the luggage compartment lid automatically swings open to facilitate loading when the luggage compartment lid is opened via the radio-operated remote control, the button is in the driver’s door or the soft-touch button in the handle recess of the luggage compartment lid; manual closing of the luggage compartment lid, including power-assisted closing which automatically pulls the luggage compartment lid into the lock should it not be completely engaged

Luggage compartment lid, electrically opening and closing
opening via the radio-operated remote control, button on the driver’s door panel or soft touch button in the luggage compartment lid handle recess or by kicking movement in conjunction with convenience key including sensor-controlled release of the luggage compartment lid; closing via button on inside of luggage compartment lid, the button in the driver’s door or via the convenience key (long press)

Garage door opener (Homelink)
programmable radio-operated remote control, operating buttons incorporated into the front roof module; can be used to open many garage doors and exterior gates; allows control of security and lighting systems; with programming assistance provided by the MMI, code identification guidance and set-up assistance from appropriate logbook information on the screen. (For information on compatible hand-held transmitters, please contact your Audi partner or visit www.eurohomelink.com)

Convenience key
access authorisation system: the key only needs to be carried with you; the vehicle is locked from outside via buttons on all 4 door handles. The convenience key system also includes aluminium-look strips on all door handles.

Power-assisted closing for the doors
doors that have not completely closed are pulled into the lock automatically; includes electric child locks on the rear doors, operated via the child lock buttons in the driver’s door armrest

Anti-theft alarm
with tow-away protection, monitors doors, bonnet, luggage compartment lid and the interior: includes an electronic immobiliser, ultrasonic interior monitoring (can be deactivated) and back-up horn independent of the vehicle electrical system; tow-away protection via a vehicle angle of inclination sensor (can be deactivated); incorporated into the engine control unit; automatically activated by the vehicle key

Fitting for Tracking Assistant
fitting for connecting a Tracking Assistant that enables a stolen vehicle to be located

The model-specific standard and optional equipment can be found in the index from page 52 onwards.

Convenience key including sensor-controlled release of the luggage compartment lid
access authorisation system: the key only needs to be carried with you; the vehicle is locked from outside via buttons on all 4 door handles. The convenience key system also includes aluminium-look strips on all door handles. Upon detection of the foot gesture (kicking movement), a sensor in the rear bumper initiates a convenience key search in the rear area. When the key is detected, this opens the luggage compartment lid. For extra comfortable loading of the luggage compartment. (The sensor-controlled luggage compartment release only works in conjunction with the luggage compartment lid, electrically opening and closing).

Glazing

Windscreen in tinted glass

Double/acoustic glazing
2 panes of glass bonded together by a plastic film; improves exterior noise insulation and theft protection

Insulating/acoustic glass
2 panes of glass bonded together by a plastic film; improves exterior noise insulation and theft protection; with additional reflective coating to reduce the build-up of heat in the interior (country-specific: with viewing window for automatic toll collection devices)

Insulating/acoustic glass with windscreen heater
full-surface of windscreen heated without heating wires that might impair visibility; heating controlled via the deluxe automatic air conditioning; makes rapid defrosting easier and ensures that the windscreen stays mist-free; (country-specific: with viewing window for automatic toll collection devices)

Sunblind, electrically adjustable for the rear window
protects the rear passengers from direct sunlight; electrical version available for the rear windscreen

Sunblind, electrically adjustable for the rear window and for the rear side windows
protects the rear passengers from direct sunlight; electrical version available for the rear windscreen and rear side windows

Dark-tinted windows (privacy glazing)
dark-tinted rear window, rear door windows and rear side windows. (Can only be ordered in conjunction with double glazing/acoustic glazing or insulating/acoustic glass)

Further exterior equipment

Trailer towing hitch
electrically swivelling, ball head and ball joint coupling made from forged steel; operated via buttons in the luggage compartment; includes trailer stabilisation system via the Electronic Stabilisation Programme (ESP)

Provision for trailer towing hitch
includes the wiring up to the spare wheel well, fitting for the control units and adapted engine cooling. The set of parts for retrofitting is available from Audi Genuine Accessories.

Model name/logo
S8 logo, in the radiator grille, illuminated on the tailgate, on the door sill trims, the front brake callipers, the leather-covered sports steering wheel and in the rev counter, as well as “V8 T” logo on the front wings

Exhaust tailpipes
dual-branch design with 2 oval tailpipes each left and right; chromed exhaust tailpipe surrounds

Bumpers
in S design; in aluminium look at the front; diffuser insert in aluminium look/Platinum grey at the rear

Audi Singleframe
radiator protective grille in Platinum grey with horizontal double chrome struts

Seats/seating comfort

Comfort centre armrest, front
divided for driver and front passenger, with fold-open storage compartments; infinite vertical/horizontal adjustment

Seat ventilation, front
ventilation of the seat centre sections and thigh support for the driver and front-passenger seats. By drawing in air, the system ensures a pleasant seating climate can be enjoyed even in high ambient temperatures; adjustable in 3 stages. Please note: if seat ventilation is fitted, the leather on the front and outer rear seats is perforated (Can only be ordered in conjunction with comfort seats in Valcona leather, Natural leather or Valonea leather and seat heaters or massage function)

Seat ventilation, front and rear
ventilation of the seat centre sections and thigh support of the driver/front-passenger and the outer rear seats. By drawing in air, the system ensures a pleasant seating climate can be enjoyed even in high ambient temperatures; adjustable in 3 stages. Please note: if seat ventilation is fitted, the leather on the front and outer rear seats is perforated (Can only be ordered in conjunction with comfort seats or comfort sports seats in Valcona leather, Natural leather or Valonea leather and seat heaters or massage function)

Seat heaters, front
for driver and front-passenger seats; heats the seat cushions, backrest surfaces and seat side bolsters and can be individually adjusted in 3 stages for each seat via a direct selection button on the A/C control panel

Seat heaters, front and rear
functions same as for front-seat heating; for the outer rear seats, can be regulated separately

Rear seat system
3 seats, with fold-out centre armrest

Comfort head restraints, rear
manually adjustable side bolsters ensure high levels of comfort by providing good lateral support (can only be ordered in conjunction with comfort seats and comfort sports seats)

Centre armrest, rear
one-piece foldable, with 2 integrated drinks holders and storage compartment; additional controls depending on which optional equipment has been selected for the rear compartment

Grab handles with wooden segments
not available for Fine grain birch wood, Pearl beige and Fine grain ash, natural Balsamic brown

Audi exclusive grab handles with wooden segments
matched to the selected Audi exclusive inlay.
From quattro GmbH

Individual rear seats, electrically adjustable
3 seater rear seat system with 2 electrically adjustable single seats; adjustment of fore/aft position, seat and upper backrest angle; pneumatic lumbar support, memory function for the single seats, rear comfort head restraints, 4-zone deluxe automatic air conditioning, rear comfort centre armrest with wood trim and controls, electric sunblinds for the rear window and rear door windows, fore/aft position of front-passenger seat electrically adjustable from the rear. (Can only be ordered in conjunction with comfort seats in Valcona leather, Natural leather or Valonea leather)

Massage function, front
massages the muscles of the driver and front passenger using 10 pneumatic cushions; 5 different programs (Wave, Tapping, Stretch, Lumbar, Shoulder) can be selected via multifunction switches on the seat; display in MMI. (can only be ordered in conjunction with comfort seats and comfort sports seats)

Massage function, front and rear
massages the muscles of the driver and front passenger using 10 pneumatic cushions; 5 different programs (Wave, Tapping, Stretch, Lumbar, Shoulder) can be selected via multifunction switches on the seat; display in MMI. Massage function for the outer rear seats; a choice of 2 programs (Wave, Tapping) each offering 3 levels of intensity; can be selected from the centre armrest. (Can only be ordered in conjunction with comfort seats or comfort sports seats)

ISOFIX child seat mountings for the two outer rear seats
standard mounting for practical attachment of child seats in accordance with ISO standards

Audi exclusive rear foot rests
colour matched to the Audi exclusive carpet. From quattro GmbH

Steering wheels/gear levers/controls

Leather-covered multifunction steering wheel in 4-spoke design with shift paddles
with full-size airbag, multifunction operating concept for operation of radio, driver information system, including trip computer and – if fitted – speech dialogue system, telephone and audio sources; switching of driver assistance system displays in driver information system; shift paddles for changing gear in manual mode; control panel in black with aluminium-look frame

Leather-covered multifunction steering wheel in 4-spoke design with shift paddles, heated
with full-size airbag, multifunction operating concept for operation of radio, driver information system, including trip computer and – if fitted – speech dialogue system, telephone and audio sources; switching of driver assistance system displays in driver information system; shift paddles for changing gear in manual mode; control panel in black with aluminium-look frame, additional heating function

Leather-covered multifunction sports steering wheel in 3-spoke design with shift paddles in aluminium look, S8 emblem and contrasting-colour seam
with full-size airbag, multifunction operating concept for operation of radio, driver information system, including trip computer and – if fitted – speech dialogue system, telephone and audio sources; switching of driver assistance system displays in driver information system; shift paddles for changing gear in manual mode; control panel in black with aluminium-look frame; with contrasting-colour seam, S8 emblem and shift paddles in aluminium look

Leather-covered multifunction sports steering wheel in 3-spoke design with shift paddles in aluminium look, S8 logo and contrasting-colour seam, heated
with full-size airbag, multifunction operating concept for operation of radio, driver information system, including trip computer and – if fitted – speech dialogue system, telephone and audio sources; switching of driver assistance system displays in driver information system; shift paddles for changing gear in manual mode; control panel in black with aluminium-look frame; with contrasting-colour seam, S8 logo and shift paddles in aluminium look, additional heating function

Steering wheel with electric angle and axial adjustment
steering wheel electrically adjustable for height and reach, with automatic entry and exit function

Steering wheel rim with wooden segments
for multifunction steering wheel in 4-spoke design with shift paddles, available in Walnut brown. From quattro GmbH

Selector lever in Carbon Atlas
with shift-by-wire technology

Selector lever in leather
colour-matched to the selected vehicle interior colour (to match the top side of the dashboard); with shift-by-wire technology

Selector lever in wood
matched to the selected inlay; with shift-by-wire technology (Cannot be ordered in conjunction with Fine grain ash, natural Balsamic brown inlays)

Audi exclusive selector lever in wood
in 6 different Audi exclusive woods, not available in Tamo ash, natural dark brown. From quattro GmbH

Audi exclusive controls
including steering wheel rim, air bag unit and selector lever in Audi exclusive leather. From quattro GmbH

Climate control

Deluxe automatic air conditioning
with indirect ventilation and sunlight-dependent control; separate temperature and air-flow control for footwell and head area for both driver and front passenger; ram air control, recirculation mode, residual heat utilisation, combined fine-particulate filter, air quality and humidity sensor and key-coded settings; choice of 3 climates: gentle, medium and intensive

4-zone deluxe automatic air conditioning
in addition to the deluxe automatic air conditioning: A/C control panel for rear-compartment climate control in the rear centre armrest with separately adjustable temperature and blower settings and air distribution for the right and left-hand sides (rear-compartment A/C functions can also be adjusted from the front A/C control panel); greater comfort for the rear passengers and enhanced heating and cooling performance through the use of a second air-conditioning unit

Auxiliary heating/ventilation
the heater warms up the interior and removes ice from the windows; the auxiliary ventilation system supplies fresh air and reduces the temperature of the interior; with timer and departure time programming (an intelligent control function for time and energy-optimised calculation of heating duration); separate radio-operated remote control with illuminated display; choice of 2 heating modes: defrost mode for windows only, comfort mode that additionally preheats the passenger compartment

Luggage securing and storage systems

Storage compartments
in the doors, the armrest and on the backs of the front-seat backrests (comfort seats and comfort sports seats only); spectacles compartment in roof module above the interior mirror; storage compartment in the front and rear centre armrests, glove compartment with light and ventilation provided by the deluxe automatic air conditioning; aluminium-look handle

Audi exclusive coolbox
with compressor cooling technology, temperature adjustment range +6 °C to -6 °C, storage compartment for two 1 litre bottles lying down, additional storage compartment for cans and glasses, LED interior lighting. From quattro GmbH.

Drinks holders
2 each at the front and rear, integrated into the centre console at the front and into the centre armrest in the rear

Through-load facility with removable ski/snowboard bag
for the practical transportation of long objects, e. g. up to 2 pairs of skis

Luggage compartment package
comprising a luggage net, 2 fold-out bag hooks integrated into the top of the luggage compartment, a 12 V socket and an umbrella holder on the inside of the luggage compartment lid

The model-specific standard and optional equipment can be found in the index from page 52 onwards.

Further interior equipment

Instrument cluster
S-specific with grey dials, white needles and S8 logo in the rev counter, with controllable lighting, coolant temperature display, fuel gauge, rev counter with digital clock, speedometer with disproportionate display and electronic odometer/trip odometer, displays for radio frequency, ambient temperature and tank range, warning and control lights, maintenance interval display

Door sill trims with aluminium inlays
with S8 logo, illuminated

Aluminium-look pedals

Cigarette lighter and ashtray
front and rear. If not required, a 12 V socket is fitted in both locations instead

Non-smoker package
one 12 V socket and storage compartment each in the front and rear centre console

230/115/100 V socket
for direct operation of AC equipment with a power output of up to 150 watts, for electrical consumers such as power packs for laptops, mobile phones or games consoles; replaces 12 V socket/cigarette lighter in rear compartment. (Can only be ordered in conjunction with 4-zone deluxe automatic air conditioning)

Floor mats, front and rear
in velour, coordinated with the carpet colour

Audi exclusive floor mats
with leather piping, front and rear, colours of mats and piping can be selected individually from different colours. From quattro GmbH

Audi exclusive carpets and floor mats
with leather piping, front and rear, colours of mats and piping can be selected individually from different colours. From quattro GmbH

MMI® and navigation systems

Audi connect
networked mobility. The term Audi connect is used to describe all the applications and developments that connect the internet, the owner and the infrastructure in current and future Audi models. Audi connect creates infotainment and entertainment functions and raises the level of both automotive comfort and fun to new heights. In the Audi S8, online information (such as navigation with point-of-interest search and Google Earth images and Street View, weather, news, Audi traffic information online[1,2], internet radio[3]) is transmitted directly to the vehicle and integrated via a UMTS module integrated online in the Bluetooth car phone and the customer's SIM card in the vehicle. The optional Audi MMI navigation plus with MMI touch enables the use of these Audi connect services. Thanks to a WiFi hotspot, the Internet can be accessed via a mobile end device from the rear during driving or when the vehicle is at a standstill; Audi connect services are only available in connection with mobile phone contracts with data option and only within the range of the respective mobile networks. Additional costs can be incurred for the reception of data packages from the internet, depending on the terms of your mobile phone contract, particularly when used abroad: because of the high data volume involved, the use of a data flat rate is strongly recommended! Please contact your mobile services provider for more detailed information. Audi connect is available in all European countries except for Turkey, Malta, Cyprus and Iceland. In Russia only in the Moscow and St. Petersburg areas. A separately charged mobile phone contract may be necessary for use of the Audi connect services and the WiFi hotspot. Please contact your mobile services provider for more detailed information. Your Audi partner can tell you more about the availability of the individual Audi connect services in your vehicle.

MMI®
integrated operating concept consisting of MMI terminal (control unit) and MMI display (retractable high-resolution 8-inch colour display in high-quality Piano finish); retrieval of six freely assignable radio station presets

MMI® Navigation plus with MMI® touch
hard disc navigaton with topographical map display and display of lots of sightseeing information and city models in 3D, choice of 3 alternative routes, scrolling along the route and manoeuvring within the map, spoken TMCpro reports, split-screen route information (manoeuvring points, points of interest on motorways, TMCpro on route), detailed junction map, motorway exits and lane recommendations also in driver information system, dynamic route guidance with TMCpro (where available), vehicle support and speed limit display based on navigation data function, destinations can also be entered via the voice control system (whole-word entry of address in one sentence) or the MMI touch; including Bluetooth interface and Audi music interface; in conjunction with the Bluetooth car phone the use of Audi connect services (e.g. navigation using Google Earth images and Street View, weather and news, Audi traffic information online) is possible.

MMI® touch
touch-sensitive control panel for intuitive operation of the MMI; letters and numbers can be entered without drivers taking their eyes off the road; contextual entry of letters and numbers for navigation destinations via handwriting recognition, selection from address book or entry of telephone numbers with acoustic acknowledgement, simple movement of navigation map and selection of points of interest; retrieval of 6 freely assignable radio station presets. (Can only be ordered in conjunction with MMI navigation plus)

Navigation data (hard drive)
contains navigation data for the following countries (where digitised):
Europe: Albania, Andorra, Austria, Belarus, Belgium, Bosnia-Herzegovina, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Germany, Gibraltar, Greece, Hungary, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Moldova, Monaco, Montenegro, the Netherlands, Norway, Poland, Portugal, Romania, Russia, San Marino, Serbia, Slovakia, Slovenia, Spain (including the Canary Islands), Sweden, Switzerland, UK, Ukraine, the Vatican
North America: Canada, Mexico, USA (including Hawaii, Puerto Rico, Virgin Islands)
Other regions: South Africa, AGCC (Oman, Qatar, Bahrain, Kuwait, Saudi Arabia, United Arab Emirates [UAE]), Asia Pacific (Singapore/Malaysia), Australia/New Zealand, China, Hong Kong/Macau, Japan, South Africa

Vehicle support based on navigation data
network technology thanks to Audi connect. Part of MMI navigation plus with MMI touch; adaptation of transmission and – if installed – adaptive cruise control with Stop&Go function or adaptive light using route data stored in the navigation system such as the sweep of bends and corners or road classifications. Example: use of vehicle lighting according to surroundings (urban area, non-urban areas, motorways and intersections)

Driver information system with 7" colour display
with high resolution TFT colour display directly in the driver's field of view; displays information about the radio frequency or the name of the station or the song, the driver assistance systems, the selected media, speed levels, outside temperature and other display content of the MMI systems, such as – if available – navigation, GPS clock, night vision assistant or the telephone menu, display for the trip computer with short and long-term memory as well as a digital speedometer and the door and luggage compartment monitoring system; the integrated efficiency programme supports you with an overview of consumption data, a display of additional power consumers and saving tips for particularly economical driving; clearly arranged with easily readable header and status lines (tab concept); automatic brightness adjustment; can be operated via the leather-covered multifunction steering wheel

[1] Audi traffic information online is available in the following countries: Germany, Austria, Switzerland, Belgium, Luxembourg, France, Italy.
[2] Right of use for Audi traffic information online for 36 months from first registration without additional use fees. Your Audi partner will be happy to give you information on how to extend use as well as associated costs.
[3] For information on when this feature will be available, please contact your Audi partner.

Radio and TV systems

Radio
can be operated via MMI; triple tuner with phase diversity for improved sound and reception; dynamic station list; TP memo function whilst driving; single DVD drive, 2 SDHC memory card readers, juke-box (with 20 GB storage capacity, supports each audio (MP3, WMA, AAC) and video formats (MPEG-1, 2, 4, WMV, Xvid and playlist-compatible). Music and video files can be copied to and played from the integral hard disc; copy-protected music files (DRM) cannot be played.

DVD/CD Changer
in glove compartment, for 6 DVDs or CDs, supports e.g. audio CDs, video DVDs and MP3, WMA, AAC, MPEG4; supports up to 4,000 tracks per medium; shock-resistant ; DVDs and CDs can be changed individually; fast forward and rewind, random playback possible. Music files with digital rights management (DRM) cannot be played.

Digital Audio Broadcasting reception (DAB)
receives programmes from digitally broadcast radio transmitters in addition to the range of analogue stations, with better sound quality, including DAB+ and DMB audio. In conjunction with MMI navigation plus, a second DAB tuner permanently searches for alternative reception frequencies of the set radio station; at the same time the station list is updated. Please note: reception depends on local digital network availability.

TV reception
reception of digitally-broadcast (DVB-T) uncoded television stations (MPEG-2 or MPEG-4 standard), DVB-T audio stations, teletext and Electronic Programme Guide (EPG). External AV-IN connection via adapter cable (available through Audi Genuine Accessories). Please note: TV reception depends on digital network availability. No AV or TV video output when driving (audio output available when driving).

Audi sound system
6-channel amplifier, 10 loudspeakers providing outstanding sound, 180 watts total output

Bang & Olufsen Advanced Sound System
surround sound reproduction with 19 loudspeakers (including subwoofer), each with its own amplifier channel; polished loudspeaker covers in aluminium; automatically extending acoustic lenses for excellent sound performance and perspective from every seat; the addition of tweeters, midrange speakers and woofers for the rear seats enables a broad stage effect to be created both front and rear; 14-channel DSP all-digital amplifier; all-digital highly efficient 5-channel ICE Power amplifiers for woofers and subwoofers; total output of over 1,400 watts; 5.1 Surround Sound reproduction possible; privacy function: encapsulated loudspeaker casings minimise escape of sound to the outside of the vehicle and provide privacy, for example when making telephone calls in hands-free mode; a precisely defined loudspeaker effect has also been achieved; noise-dependent volume adjustment

BOSE Surround Sound
surround sound reproduction with 14 loudspeakers, including centre speaker and subwoofer, 12-channel amplifier with total output of over 600 watts; Audiopilot® for noise-dependent volume adjustment; 5.1 Surround Sound reproduction is possible; the Acoustic Wave loudspeaker technology of the woofers in both front doors enables powerful and accurate bass reproduction.

Audi music interface
for connecting generation 4 and higher Apple iPods, an Apple iPhone (music functionality) as well as USB storage media and MP3 players. The Audi music interface is housed in the centre console; it is operated via the MMI or the multifunction leather steering wheel. Note: can only be used in conjunction with a special adapter cable (available from Audi Genuine Accessories). Please contact your Audi partner or visit www.audi.com/mp3 for information on compatible MP3 players. (Part of MMI navigation plus with MMI touch)

Adapter cable set for Audi music interface
consisting of 2 connection cables for the connection of iPod/iPhone or data carrier/media player with USB connection (type A); visit www.audi.com/mp3 for information on compatibility; further adapter cables available from Audi Genuine Accessories

Adapter cable set plus for Audi music interface
consisting of 2 connection cables for the connection of iPod/iPhone or data carrier/media player with USB connection (type A); supports the display of CoverArts and video functions; depends on the iPod used; can only be used in conjunction with more recent iPod generations; visit www.audi.com/mp3 for information on compatibility; further adapter cables available from Audi Genuine Accessories

Rear Seat Entertainment
consists of 2 high-resolution adjustable-angle 10.2-inch LCD displays for the rear passengers; separate single DVD player in the rear compartment; 2 SDHC card readers, a dedicated jukebox with 20 GB of storage; Audi music interface with facility for connecting to an iPod, USB media (e. g. external hard disc), AUX-in and AV-in (e. g. external video games consoles); supports audio formats (MP3, WMA and AAC-compatible) and video formats (MPEG-1, 2, 4, WMV and Xvid-compatible) as well as playlists; copy-protected music files (DRM) cannot be played. Use of navigation functions, e. g navigation system display same as in MMI display, separate route planning and transfer of navigation information to MMI navigation plus with MMI touch is possible. Includes separate MMI control panel for the rear passengers, based on the proven MMI operating concept, with 2 separate volume controls incorporated into the rear centre armrest. Possible to have separate and shared video and audio sources for the left and right-hand seats; sound is output via the vehicle's sound system; possible to have wireless headphones (included in package) or wired headphones. 5.1 Surround Sound is supported if combined with the BOSE Surround Sound or the Bang & Advanced Sound System. Possible to access optional DVD/CD changer and TV tuner

Telephone and communication

Fitting for mobile phone (Bluetooth)
includes a hands-free facility (including voice control for the telephone functions) and a fitting for an optional mobile-specific charger (available from Audi Genuine Accessories) with a connection to the external aerial (via the base plate and adapter); operation via the MMI, the multifunction leather steering wheel or the speech dialogue system; for adapters and information on compatible mobile phones, please contact your Audi partner or visit www.audi.de/telefon on the Internet

Bluetooth car phone online
your Bluetooth-compatible mobile phone can be conveniently connected to the vehicle's internal UMTS module (provided the mobile telephone has a SIM Access profile); additional SIM card reader in the surround of the MMI navigation plus with MMI touch. Transfer of phone book entries to the vehicle and management of call lists. Including the Audi connect services traffic information online, point-of-interest search, navigation by means of Google Earth images and Street View, destination entry, information services e.g. weather and WiFi hotspot for Internet access in the rear using a mobile end device (e.g. laptop). Because of the high data volumes (currently concerns in particular navigation with the aid of Google Earth images and WiFi hotspot), a mobile phone contract including a data flat rate is strongly recommended. The content and scope of the Audi connect services offered may vary and are only available for mobile phone contracts including a data download option and only within the coverage of the mobile phone network; additional costs arise for the use of these services (charges and billing correspond to your personal mobile phone contract); they are only offered in Europe (in Russia only in the Moscow and St. Petersburg areas; not in Turkey, Cyprus, Malta and Iceland); simple operation via MMI navigation plus with MMI touch, a leather-covered multifunction steering wheel or the voice control system. (Can only be ordered in conjunction with MMI navigation plus)

The model-specific standard and optional equipment can be found in the index from page 52 onwards.

Handset for Bluetooth car phone online, front
with colour display and integrated SIM card reader, for making private phone calls; easy writing of text messages thanks to automatic word recognition

Handset for Bluetooth car phone, front and rear
2 separate handsets with colour display and integrated SIM card reader, for making private calls; texts can be easily written thanks to automatic word recognition, one each in the front and rear centre armrest. (Can only be ordered in conjunction with MMI navigation plus or MMI touch).

Bluetooth interface part of the MMI® navigation plus with MMI® touch
Bluetooth-compatible mobile phones can be connected to the vehicle via the interface; hands-free calls are possible in the vehicle via the microphone

Assistance systems

Audi pre sense basic
networking the different vehicle systems enables driving situations to be categorised and, where necessary, actions to be implemented for preventive occupant protection. Such actions include seat belt tensioning, activation of the hazard warning lights and closing of sunroof and windows.

adaptive cruise control with Stop&Go function incl. Audi pre sense front
automatic distance control (control range 0–250 km/h); working within system limits, it uses 2 radar sensors and a camera to detect vehicles ahead and maintains the distance by automatic braking and accelerating; independent braking to a stop, automated restart at driver's request; 4 distance levels and 4 driving modes (efficiency, comfort, dynamic and standard) can be selected individually. The use of Audi connect services is possible in conjunction with MMI navigation plus; due to route data stored in the navigation system such as the sweep of bends and corners or road classifications an even more comfortable distance control is possible, for example if you drive again on the same winding roads. In addition to the functions of Audi pre sense basic, **Audi pre sense front** implements preventive occupant protection measures when threatened with an imminent frontal collision; includes Audi braking guard with driver warning through an extended brake assist feature and preventative occupant protection. Working within system limits, Audi pre sense front utilises the front sensors of the adaptive cruise control with Stop&Go function to carry out its detection tasks; extended by the function of maximum deceleration: this is initiated at speeds below 30 km/h if there is a danger of collision with a stationary or moving vehicle in order to reduce the severety of the collision or to avoid this collision if possible. **Audi pre sense plus** is included if Audi side assist is also ordered. In addition to the functions of Audi pre sense front, Audi pre sense plus activates the Audi braking guard also in certain situations at higher speeds when a collision is unavoidable and initiates a full braking action to minimise the severity of the crash by a reduction of the speed of up to 40 km/h. (Can only be ordered in conjunction with parking system plus or parking system plus with reversing camera)

Audi side assist including Audi pre sense rear
lane change assistant; working within system limits, it assists the driver when changing lanes (operating range 30–250 km/h). Displays are incorporated into both exterior mirrors. Audi side assist uses 2 radar sensors to measure the vehicle's distance from other vehicles it has detected as well as the speed difference between them. If Audi side assist classifies the speed difference and distance as being critical in the event of a lane change, a display will appear in the respective exterior mirror. In addition to the functions of Audi pre sense basic, **Audi pre sense rear**, working within system limits, uses the rear sensors of Audi side assist to detect a possible rear-end collision. Audi pre sense plus is included if Audi adaptive cruise control with Stop&Go functioning is also ordered. In addition to the functions of Audi pre sense front, **Audi pre sense plus** activates the Audi braking guard in certain situations when a collision is unavoidable and initiates a full braking action to minimise the severity of the crash by a reduction of the speed of up to 40 km/h

Audi lane assist
lane compliance assistant; working within system limits, it informs the driver if he is unintentionally leaving the traffic lane (operating range 60–250 km/h). If the system is activated and operational and if the driver has not switched on the indicator, the driver will be notified via steering wheel vibrations shortly before or while crossing the traffic lane marker recognised by Audi lane assist. (Can only be ordered in conjunction with 4-spoke multifunction leather steering wheel)

Night vision assistant, detected pedestrians highlighted
with integrated thermal imaging camera; when driving at night, this system extends the driver's range of visibility beyond the light provided by the dipped beam; records thermal images; an image processing algorithm then evaluates the camera's data and marks any persons it has detected in yellow in the driver information system's colour display; the marking changes to red and a warning tone is emitted if the system, by analysing the movement and position of the person it has detected, considers that there is a possible risk. Image quality is affected in poor ambient conditions

Parking aid plus with surrounding cameras
acoustic and visual parking aid for the front and rear, image of area behind the vehicle shown on the MMI display, with dynamic display modes showing the calculated path (steer-angle dependent), includes help lines and guidelines and identification of point at which to apply opposite lock when parallel parking, reversing camera concealed in the handle strip of the luggage compartment lid, display modes for front side left/right and rear side left/right for safe pulling out of narrow parking spaces, courtyard entrances or in the parking garage, additional display mode for the surroundings as virtual overhead view of the vehicle (bird's eye perspective), view of the vehicle, wide-angled cameras cover the entire area around the vehicle. The driver can select between the different image views in the MMI display, based on the data from the camera. Reversing image with switchable help lines for cross- and curbside parking, and for attaching trailers, front camera image, from across and behind, surrounding image.

Parking system plus with reversing camera
acoustic and visual parking aid for front and rear, image of area behind the vehicle shown on the MMI display, with dynamic display modes showing the calculated path (steer-angle dependent); includes help lines and guidelines and identification of point at which to apply opposite lock when parallel parking, reversing camera concealed in the handle strip of the luggage compartment lid

Parking system plus
acoustic and visual park assist system for the front and rear with MMI screen display; measurement is by ultrasonic sensors concealed in the bumpers

Speed limit display
camera based recognition and display of speed limits, including temporary speed limit displays (e. g. above motorways). Additionally, within system limits, there is an evaluation of the particular situation in wet conditions, and speed limits displayed depending on the time of the day, road works and when using a trailer. If a sign has not been recognised by the camera, thanks to Audi connect, the speed limit displayed can be taken from the navigation data (where available). (Can only be ordered in conjunction with adaptive cruise control with Stop&Go function and/or Audi lane assist)

cruise control
maintains any speed above around 30 km/h, provided engine power output and engine braking effect permit; automatic braking function, e.g. when driving downhill; operated via separate steering column stalk

Hold assist
holds the vehicle stationary for unlimited periods after stopping on normal uphill and normal downhill gradients. The system is activated by push-button and allows the driver to drive away easily and comfortably without having to operate the electromechanical parking brake.

Suspension/brakes

Audi drive select
changes vehicle characteristics, e.g., by adapting power steering assistance, accelerator and gearshift characteristics, and (if ordered) adaptive air suspension; modes available: comfort, auto, dynamic, efficiency and individual. The system also influences other optional equipment.

Dynamic steering
when changing lanes, parking and cornering, this system improves comfort and handling by dynamically regulating steering according to the driving situation. In addition to adaptation of the steering effort, the steering angle is also adapted (steering ratio). The system is also supported further by vehicle stabilisation through ESP.

adaptive air suspension sport with S8-specific tuning
sports suspension based on the standard-fitted adaptive air suspension; stiffer damping, vehicle ride height lowered by up to 10 mm depending on mode; different modes selected via Audi drive select

Ceramic brakes*
19-inch high-performance braking system with carbon-fibre reinforced ceramic brake discs front and rear, specially developed cooling channels for the ventilated and perforated brake discs; high-gloss brake callipers, painted in anthracite, with “Audi ceramic” logo at the front

Braking system
with anti-lock brakes (ABS), electronic brake force distribution (EBD) and hydraulic brake assist, ventilated disc brakes front and rear, rear brakes with electro-mechanical parking brake and black painted brake callipers, at the front with Titanium grey S8 sticker

Electromechanical parking brake
with hold assist; includes parking brake function when stationary, drive-off assistance function by means of automatic release when driving away and emergency braking function whilst driving acting on all 4 wheels

Technology/safety

Audi Space Frame (ASF) body
innovative combination of materials, a high degree of rigidity for enhanced handling and greater stability

side-on collision protection
consisting of bending-resistant door impact beams and reinforced body side structure, particularly in the B-pillars and sills

Airbags
2-stage deployment; front and rear side airbags incorporated into the seat backrests; the head airbag system unfolds along the entire length of the side windows as a protective cushion and protects the occupants in the front and outer rear seats in the event of a side impact.

Deactivation switch for front-passenger airbag

Integrated head restraint system
in the event of a rear-end collision, the design of the seat restrains the upper torso and supports the head at an early stage, thereby increasing safety and reducing the danger of whiplash

Seat belts
3-point inertia reel seat belts with reversible belt tensioners, adaptive belt force limiters and belt height adjustment/belt buckle status query at front; seat belt reminder function for driver and front-passenger seats with acoustic and visual warning signal

Audi exclusive seat belts
available in various Audi exclusive colours to match the Audi exclusive leather range of colours. From quattro GmbH

Warning and indicator lamps
in the instrument cluster for, among others: airbag, ABS, ESP/ASR, adaptive air suspension, activated electromechanical parking brake and cruise control, EDL electronics, main beam, indicators, rear fog lights, engine electronics and electronic accelerator

First-aid kit
in the storage compartment in the rear centre armrest

Warning triangle
with bracket on the inside of the luggage compartment lid

Anti-lock braking system (ABS)
with electronic brake-force distribution (EBD) and hydraulic brake assist

Traction control (ASR)
for good traction and lateral stability, reduces spinning of the drive wheels

Electronic Differential Lock (EDL)
on surfaces with varying levels of grip, this start-off assistant automatically brakes the drive wheels on the surface that is too slippery, thereby ensuring smooth, powerful progress.

Electronic Stabilisation Programme (ESP)
with offroad detection, networks the ABS, EBD, ASR and EDL with its own sensors and compares the driving data with reference data; provides better stability at all speeds by targeted braking of individual wheels and intervention in the engine management system

tiptronic
8-speed automatic transmission with Dynamic Shift Program (DSP), option of manual control via shift paddles on the multifunction leather steering wheel; includes additional sports program

quattro® with sports differential
permanent all-wheel drive with wheel-selective torque distribution on the front wheels. The electronically controlled sports differential distributes variable amounts of driving force to each wheel and ensures outstanding acceleration performance in corners and stabilises the vehicle’s response to load change; it also improves direct steering characteristics and provides more agile handling due to the lower steering effort required.

Start-stop system
helps to reduce fuel consumption and CO_2 emissions by switching off the engine when standing, e.g. at traffic lights. The start process is initiated as soon as the foot brake is released for a perfect getaway. Can be deactivated at any time via a button

Recuperation
Increasing the generator voltage converts kinetic energy into usable electrical energy when the vehicle is coasting or braking. This energy is then used to assist the generator during subsequent acceleration, saving up to 3 % fuel.

Active Noise Cancellation
the Active Noise Cancellation system can compensate noises from individual frequencies depending on the engine speeds

The model-specific standard and optional equipment can be found in the index from page 52 onwards.

Audi extended warranty

Audi extended warranty
can only be ordered directly and exclusively on purchase of a new car; is a consistent continuation of the manufacturer's guarantee so that you are protected against risk and can control servicing costs even after the first 2 years. There is a total of 9 lifetime/total mileage combinations to choose from:

1 additional year under Audi extended warranty, maximum total mileage of 30,000 km

1 additional year under Audi extended warranty, maximum total mileage of 60,000 km

1 additional year under Audi extended warranty, maximum total mileage of 90,000 km

2 additional years under Audi extended warranty, maximum total mileage of 40,000 km

2 additional years under Audi extended warranty, maximum total mileage of 80,000 km

2 additional years under Audi extended warranty, maximum total mileage of 120,000 km

3 additional years under Audi extended warranty, maximum total mileage of 50,000 km

3 additional years under Audi extended warranty, maximum total mileage of 100,000 km

3 additional years under Audi extended warranty, maximum total mileage of 150,000 km

* Please find out more about the special features for the ceramic brakes on your national Audi website or from your Audi partner.

Model		S8 4.0 TFSI
Engine type		V8 cylinder biturbo petrol engine with direct fuel injection
Displacement in cc (valves per cylinder)		3993 (4)
Max. output[1] in kW at rpm		382/6000
Max. torque in Nm at rpm		650/1700–5500
Power transmission/wheels		
Type of drive		quattro® permanent all-wheel drive
Transmission		8-speed tiptronic
Wheels		Cast aluminium wheels, 9 J x 20
Tyres		265/40 R 20
Weights/capacities		
Unladen weight[2] in kg		2050
Gross vehicle weight in kg		2650
Roof load/trailer nose weight in kg		100/95
Trailer load limit[3] in kg	unbraked 12 % gradient 8 % gradient	750 2300 2300
Fuel tank capacity, approx., in l		90
Performance/consumption[4]		
Top speed in km/h		250[5]
Acceleration 0–100 km/h in s		4.2
Fuel grade		SuperPlus sulphur-free RON 98[6]
Fuel consumption[7] in l/100 km	combined	10.2
CO_2 emissions[7] in g/km	combined	237
Emissions standard		EU5

Notes

[1] The figure stated was calculated using the specified measuring procedure (current version of Directive 80/1269/EEC).

[2] Weight of car, unladen, with driver (68 kg), luggage (7 kg) and fuel tank 90% full, calculated in accordance with the current version of Directive 92/21/EEC. Optional equipment may increase the car's unladen weight and drag coefficient, whereupon the possible payload limit and the top speed will be reduced accordingly.

[3] The engine's power output always goes down with increasing altitude. At 1,000 m above sea level, and for every additional 1,000 m, deduct 10 % from the weight of the outfit (trailer load limit + gross weight of the towing vehicle). Figure for trailer load limit applies to factory-fitted trailer towing hitch. If using the vehicle with a trailer towing hitch for commercial purposes, a digital tachograph may be required under certain conditions.

[4] A vehicle's fuel consumption and CO_2 emissions do not just depend on how efficiently the vehicle uses the fuel, but are also influenced by driving behaviour and other non-technical factors. CO_2 is the greenhouse gas primarily responsible for global warming.

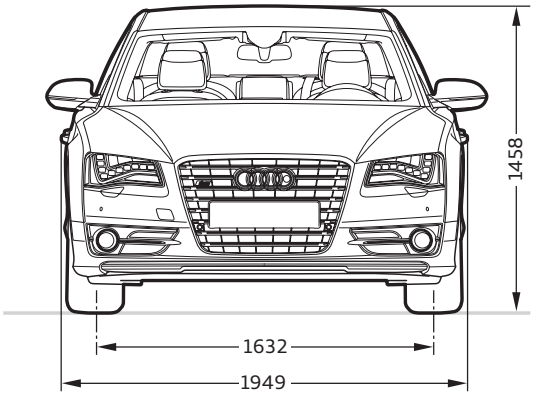
[5] Regulated.

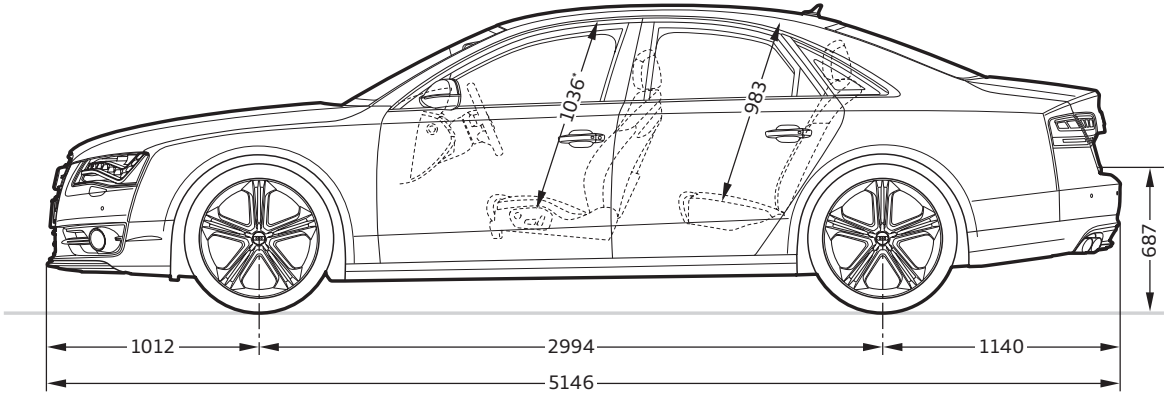
[6] We recommend using sulphur-free super unleaded (RON 98) in accordance with DIN EN 228. If not available, use sulphur-free super unleaded RON 95 in accordance with DIN EN 228; power output will be slightly reduced. Unleaded RON 95 fuel with a maximum ethanol content of 10% (E10) can generally be used. Fuel consumption details refer to operation with RON 95 fuel in accordance with 692/2008/EC.

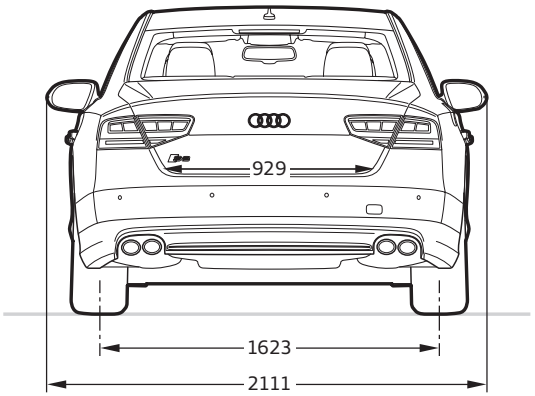
[7] The figures given were calculated using the specified measuring procedures. The figures do not refer to one individual vehicle and do not form part of any offer, but rather should be used purely for purposes of comparison between the different vehicle models.

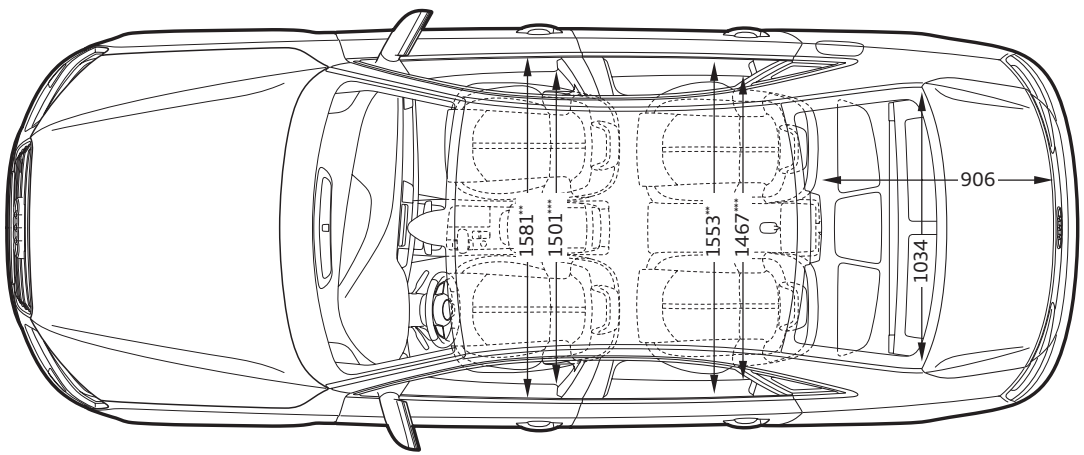
Important note

Inspections are due as shown by the service display.









Dimensions in millimetres.
Dimensions were measured with vehicle at unladen weight, ground clearance measured with vehicle carrying its maximum load.
Luggage compartment volume in l: 510 (measured by the VDA method using 200 x 100 x 50 mm blocks).
Turning circle approx. 12.3 m.
*Maximum headroom. **Elbow room width. ***Shoulder room width.
